BIOMARK ANNOUNCES GRANT FUNDED PARTNERSHIP WITH TMIC

Vancouver, British Columbia – (March 2, 2015) – BioMark Diagnostics Inc. (“BioMark”) (CSE: BUX, FSE: 20B, OTCQB : BMKDF)

BioMark Diagnostics Inc. is proud to announce that it has obtained NSERC Engage Grant partnership funding in collaboration with Dr. David Wishart, Director of The Metabolomics Innovation Centre (TMIC) at the University of Alberta.

President and CEO Rashid Ahmed says, “We are delighted to enhance our collaboration with Dr. Wishart and TMIC at the University of Alberta. The collaboration to research, validate and establish additional biomarkers with a premier metabolic institution is testimony on the importance of metabolic tests for clinical and diagnostic applications. Dr. Wishart’s expertise and TMIC’s infrastructure offers BioMark an ideal partnership.” BioMark acknowledges and is thankful for the continued support and commitment from Natural Sciences and Engineering Research Council of Canada.

About TMIC:

The Metabolomics Innovation Centre (TMIC) is a Genome Canada funded Science & Technology Innovation Centre for metabolomics research, technology development and services. TMIC builds on metabolomics expertise at the University of Alberta and the University of Victoria, which includes nearly \$20 million in state-of-the-art metabolomics equipment and ongoing investment for “omics” research and technologies by Genome Canada, Genome British Columbia and Genome Alberta. TMIC’s technologies are based on NMR, mass spectrometry, gas chromatography and novel bioinformatics tools to support clinical trial research, biomedical studies, agricultural studies, nutrient profiling and environmental testing for applications such as human health and disease, petroleum research, forensics, food and nutrition, anti-doping, and textile sciences. TMIC provides access to cutting-edge metabolomic and bioinformatics technologies for Genome Canada-funded projects and the broader research community including government, academia and industry. For more information, visit www.metabolomicscentre.ca.

About BioMark Diagnostics Inc.

BioMark is developing proprietary, non-invasive, and accurate cancer diagnostic solutions which can help detect, monitor and assess treatment for cancer early and cost effectively. The technology can

also be used for measuring response to treatment and potentially for serial monitoring for cancer survivors.

Further information about BioMark is available under its profile on the SEDAR website www.sedar.com and on the CSE website www.thecse.ca.
