

FORM 7

MONTHLY PROGRESS REPORT

Name of Listed Issuer: **BioMark Diagnostics Inc.** (the "Issuer").

Trading Symbol: **BUX**

Number of Outstanding Listed Securities: **83,286,229**

Date: **April 2nd, 2023**

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered, nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Issuer continued its business of developing proprietary, non-invasive, and accurate cancer diagnostic solutions which can help detect, monitor, and assess treatment for cancer early, accurately and cost effectively. The Company continues to hold regular management meetings regarding all aspects of the Company's business plan and executes action items that result from these meetings.

Management's primary areas of focus continue to include:

- **Accelerating commercialization efforts of its early lung cancer lab developed test (LDT) following promising interim data presented at European Society of Medical Oncology in Paris France on Sept 10th. The data was derived from an independent large scale retrospective study with expanded control. The results were statistically significant and generated interest from leading institutions across Europe, India and S. America which the company is actively pursuing. In addition, very encouraging results were presented recently on rare and hard to diagnose of Neuroendocrine tumours. Please see below.**
- **Preparation for lab certification and accreditation to meet both the ISO 15189:2012 standard for the Canadian operation but also CLIA and CAP approvals to provide lab services in U.S.**
- **Engage with USA medical institutions, insurance companies (payers) regulatory experts and bio-pharma partners as it's early lung cancer LDT commercialization efforts gather momentum. US market is strategic due to its large addressable lung cancer screening market for at risk population (Over 16 million annually). There's only a 5-6% penetration of screening related to this at-risk population.**
- **Seek additional non-dilutive funding resources for its lab operations, certification of its clinical lab, U.S. expansion, business development and clinical studies.**

2. Provide a general overview and discussion of the activities of management.
- **Businesses are still facing strong inflationary headwinds, supply chain bottlenecks and labour shortages especially in bioinformatics and laboratory technician. Management is taking measures to counteract any negative impact of these factors by instituting agile strategies with resilient operational and financial systems/processes.**
 - **On March 1st, 2023, BioMark reported its operational update for the third quarter ended December 31, 2022, as well as outlook for 2023.**
 - **On March 16th, 2023, BioMark announced that novel liquid biopsy data was presented at the 112th Annual Meeting of the United States and Canadian Academy of Pathology (USCAP) in New Orleans, LA that Pulmonary Neuroendocrine Tumors (NETs) are reprogramming their metabolism as reflected by the presence of a panel of distinct metabolic biomarkers. The research team were able to detect neuroendocrine tumors from plasma samples using BioMark innovative liquid biopsy technology. The study included a total of 120 plasma samples from patients with biopsy-confirmed NET and 227 control patients and is one of the largest ever reported. Our research team were able to discover a panel of robust metabolic biomarkers that is capable to diagnose NETs with strong performance, but more importantly distinguish NET subtypes from each other and from NSCLC. The results suggest that this metabolic panel could allow the implementation of a routine screening test for NETs and aid in monitoring clinical evolution of neuroendocrine carcinomas. Moreover, due to the non-specificity of the symptoms of NET patients at early stage, we believe that this test may support early diagnosis. This resulted in strong exposure and interest within the pathologist and scientific communities. The study further demonstrated the versatility and robustness of BioMark's technology platform to diagnose hard to detect and treat cancers at early stages where outcomes are better for patients.**
 - **First batch of clinical samples from our clinical partner institution Hospices Civils de Lyon (HCL) in France were received in early February. These samples will be analysed in BioMark's lab facilities based in Quebec City once technology platform validation and verification are completed. Additional samples will be shipped in two different allotments. The first batch of the samples will be analysed in late April and data to be shared with the oncologist investigators at HCL. HCL has requested our participation at a 3-day scientific and medical event in**

Paris, France. Dr. Fabien Lamaze, an associate researcher in Dr. Joubert's lab and the scientific lead in the 4000 early multi model lung cancer study will be making this important presentation. Dr. Lamaze has a PhD in computational Biology (CHU de Québec) and a post-doc in bioinformatics in cancer.

- BioMark received the Notice of Allowance issued by USPTO for the patent application of Method of Detecting Lung Cancer in USA. The patent is being finally reviewed by the Examiner and final news release related to the granting of the patent will be officially released.
- March 29, 2023 – BioMark resumed deeper discussions with related parties in Brazil. NDAs are being finalized with all parties. In addition, Canadian Trade Commissioner in Brazil is providing important country specific information to facilitate a deeper market understanding of the dynamic Brazilian market and key health imperatives under the newly elected government. More updates to follow as advancements are made.
- BioMark's clinical collaborator at Mt. Sinai Dr. Rolfo presented at recent European Lung Cancer Conference (ELCC) on March 30th in Copenhagen. His presentation included posters and publications related to BioMark's scientific and clinical research over the past 4 years.
- BioMark continued to entertain discussions with various financial institutions, individuals, and government agencies to secure non-dilutive funding, favourable loans, and equity investments to accelerate the commercialization of its early lung cancer liquid biopsy franchise and to advance its expansion strategy in USA and internationally as well as for general corporate purposes.

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

Not applicable.

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.

Not applicable.

5. Describe any new business relationships entered into between the Issuer, the Issuer's affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship.

Not applicable.

6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced.

Not applicable.

7. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how the consideration was determined and whether the acquisition was from, or the disposition was to a Related Person of the Issuer and provide details of the relationship.

Not applicable.

8. Describe the acquisition of new customers or loss of customers.

Not applicable.

9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trademarks.

The Issuer continues to file trademark and patents in specific jurisdictions for all its patents. Review of the filings and opinions from patent offices are being reviewed as needed.

10. Report on any employee hiring, terminations or lay-offs with details of anticipated length of lay-offs.

Not applicable.

11. Report on any labour disputes and resolutions of those disputes if applicable.

Not applicable.

12. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings.

Not applicable.

13. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness.

Not applicable.

14. Provide details of any securities issued and options or warrants granted.

Not applicable.

15. Provide details of any loans to or by Related Persons.

Not applicable.

16. Provide details of any changes in directors, officers, or committee members.

Not applicable.

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

The trends and risks which are likely to impact the Issuer are discussed in the Form 51-102F1 Management's Discussion & Analysis Annual Report for the Year Ended March 31, 2022.

Certificate Of Compliance

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there where is no material information concerning the Issuer which has not been publicly disclosed.
3. The undersigned hereby certifies to the Exchange that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all Exchange Requirements (as defined in CNSX Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.

Dated April 2nd, 2023.
